DETAILED ACTION

1. This communication is responsive to the application filed 03/13/2003.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2643**.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 20-28 and 30, drawn to the structures/structural elements of a battery for a hearing aid, classified in class 381, subclass 23.1.
 - II. Claims 9-19, drawn to the structures/structural elements of an interface for a power supply of a hearing aid, classified in class 381, subclass 323.
 - III. Claims 29, 31-44 and 62-64, drawn to the structures/structural elements of a hearing aid, classified in class 381, subclass 312.
 - IV. Claims 45-55, drawn to the structures/structural elements of a housing member for a hearing aid, classified in class 381, subclass 322.
 - V. Claims 56-57 and 59-61, drawn to the structures/structural elements for component mounting of a hearing aid, classified in class 381, subclass 324.
 - VI. Claim 58, drawn to the manufacturing of a hearing aid, classified in class 29, subclass 896.21.
 - VII. Claims 65-68, drawn to packaging a hearing aid, classified in class 29, subclass 896.21.
4. The inventions are distinct, each from the other because of the following reason:

Some inventions are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP ' 806.05(f)). In the instant case the process can be performed by a different means.

5. Some inventions are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP ' 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I only drawn to a battery for a hearing aid. The subcombination has separate utility such as a housing for any hearing device.

6. Because these inventions are distinct for the reasons giving above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for one group is not required for other groups. Restriction for examination purposes as indicated is proper.

8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2643

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
